Subject Index to Volume 4

Alkaline phosphatase, in schizophrenia, 29ff
Amphetamine intoxication, behavioral analysis, 215ff

Behavioral depression, tyrosine hydroxylase in, 193ff
Biology, and psychology, 257ff
Body weight
  in obesity, 247ff
  relation to activity, 247ff

Catatonia, serum ceruloplasmin in, 231ff
Cerebellar synapses, mediation of, by norepinephrine, 157ff
Character disorder
  emotionally unstable, 65ff, 81ff
  prediction of outcome, 81ff
Chlorpromazine, in schizophrenia, 251ff
Cholinesterase, in schizophrenia, 17ff

D-glucose, in mouse brain, 239ff
D-mannose, effects of isolation, 239ff
D-mannose, in mouse brain, 239ff
Depression, unipolar, 205ff
Disease
  definition of, 191f
  psychiatric, 191f
Dreaming
  evolutionary theory of, 131ff
  role of pineal, 131ff

EEG
  effect of chlorpromazine, 251ff
  in schizophrenia, 251ff
  rhythms, 251ff
  sleep patterns, 3ff
Electroencephalogram, effect of nicotine, 105ff
Electrosleep, clinical study of, 179ff
Electrosleep, subjective experience, 187ff

Indole metabolism, and behavior, 51ff
Intelligence, 1f

Monoamine oxidase, in brain, 147ff

Neuropsychopharmacology, model system, 157ff
Nicotine
  electrophysiological effects, 105ff
  tranquilizing effects, 105ff

Pineal gland, in dreaming, 131ff
Propranolol, 193ff
Psychiatry, biological vs. psychodynamic, 93ff

Schizophrenia
  and alkaline phosphates, 89ff

© 1972 Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011.

Schizophrenia–*cont.*
and cholinesterase, 17
and EEG, 251ff
and serum transaminases, 89ff
serum ceruloplasmin in, 231
Serum transaminases, in schizophrenia, 89ff
Sleep
EEG patterns, 3ff
in schizophrenics, 3ff
prints, 3ff
Speech rhythms
influence of dextroamphetamine, 243ff
influence of LSD-25, 243ff
Tyrosine
by propranolol, 193ff
hydroxylase, activation, 193ff
in behavioral depression, 193ff
Verbal behavior
analysis of, 33ff
content, 33ff
